"We cannot always build the future for youth, but we can build our youth for the future."

It gives me immense satisfaction that next issue of our newsletter is ready for the readers. A college newsletter mirrors the success story of an institution and act as a great medium to reach out to the outer world. It reflects upon the persistent and committed efforts made by faculty, staff and students for taking the institution one step ahead. Continuing the same tradition, this issue, reflects upon commendable contribution made by all members of INNOVATIVE family in their fields of expertise as well as for the overall growth of the college. I congratulate everyone for their bit of service for the institution and do expect the same in times to come. I also congratulate the editorial team for bringing out present issue of newsletter.

Wish you good luck!

Dr. S. L. Nasa

Innovative College of Pharmacy was set up in the year 2005, since then, it has progressed swiftly, overcoming the difficulties that crop up in the nascent stage and has made best efforts to maintain the quality of instruction. I compliment the management and faculty members of ICP for their energy, dynamism and commitment in steering this Institute most admirably in its formative years. The Institute under the dynamic leadership of the Chairman Dr. K. R. Sharma deserves appreciation.

“Success is not the key to happiness; happiness is the key to success. If you love what you are doing, you will be successful.” **True success comes when you achieve success in health, wealth, relation and spirituality.** These are considered as the 4 pillars of a successful, happy and healthy life. Yet the greatest barrier to success and one of the biggest fears in life that people have is - fear of failure. It is also the major reason that holds back people from realizing their full potential and achieving their goals.

Dr. V. P. Singh

Prof. Rihan Khan Suri

The pharmacy is a diverse and rewarding career, with opportunities for patient care, scientific research and innovation. Pharmacist is the vital part of the healthcare team who provides prescription medications to individuals. Pharmacists also advise their patients in assuring the appropriate use of medications. Nowadays, there is increase in number of pharmacy professionals as there are many practice areas such as community pharmacist, hospital pharmacist, industrial pharmacist and academic pharmacist.

I found ICP students are full of bright and innovative ideas, spirited, energetic and willing to embrace challenges. The knowledge of a pharmacy student should be current and updating of his knowledge is necessary. Every college should provide the students an atmosphere to nourish his internal skills and qualities. A system should be devised so that each and every student gets an opportunity to freely think and develop his skills to the maximum.
